

Preface

The new OFFICE OF SPECIAL FUNDED PROJECTS INFORMATION AND PROCEDURES GUIDE is a major update of the existing EXTERNALLY FINANCED PROJECTS BRANCH INFORMATION & PROCEDURES GUIDE. When published in its entirety, the new Guide will supersede and replace the existing.

As the new Guide is written, completed sections will be posted on the OSFP website for immediate implementation. Accordingly, the necessary Change Letters will be issued to delete the existing sections and to implement the new sections. Once all sections of the new Guide are complete, the entire Guide will be published and be made available.

The new Guide will contain the most current standards and procedures for developing structure portions of special funded projects. Where possible, the new Guide will eliminate and reduce requirements in the interest of accelerating projects. The new Guide will be expanded in some areas, but reduced in others, such as eliminating internal office procedures from the guide. The focus of the updating effort is to strive for a more useful manual for Districts, sponsoring Agencies and Consultants.

(Some of the wording in this Preface is specifically for the Web presentation and will be modified for the final published paper version of the guide.)
